

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class TMPro_Examples_TextConsole_Simulator["TMPro.Examples.TextConsole Simulator"]
    TMPro_Examples_TextConsole_Simulator --|> MonoBehaviour
```

The diagram illustrates a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a white box with a black border, divided into three horizontal sections. The top section contains the class name. Below it are two empty sections. At the bottom is the 'TMPro.Examples.TextConsole Simulator' class, represented by a grey box with a black border, also divided into three horizontal sections. The top section contains the class name, and the two bottom sections are empty. A blue arrow points from the top of the 'TMPro.Examples.TextConsole Simulator' box to the bottom of the 'MonoBehaviour' box, indicating that the simulator inherits from the MonoBehaviour class.
